

FARMERS ELECTRIC COOPERATIVE, INC. OF NEW MEXICO
ORIGINAL TARIFF RATE 20

STANDBY SERVICE RIDER

Page 1 of 2

AVAILABILITY:

Available to Distributed Generation connected in parallel operation to the Cooperative's lines in accordance with the Cooperative's service rules and regulations. This rider shall apply to the following:

- A. All new customer loads that can self-generate fifty (50) kW or greater, or in other ways provide a portion of their own requirements and continue to receive a portion of their requirements from the cooperative.
- B. All existing customer loads after the effective date of this Rider that install additional self-generation of fifty (50) kW or greater, modify existing self-generation facilities of fifty (50) kW or greater, or in other ways provide a portion of their own requirements but continue to receive a portion of their requirements from the cooperative.

New Customer Load means any end-use customer load that has not been previously metered by the cooperative or its power supplier Western Farmers Electric Cooperative for which this Rider is applicable. If a load is purchased, transferred, changes names, or is clearly a previously served load and has not had zero billing for the past eighteen (18) months, the load shall be treated as an existing load member.

Existing Customer Load means any end-use member load with self-generation installed prior to the effective date of this Rider. Existing Member Load shall not be subject to the provisions of this Rider unless modified pursuant to section B above.

This Rider shall not apply to Member loads with generators used solely for load control during called Peak Hour periods or Member loads with generators being used solely for outage and emergency purposes.

This Rider shall not apply to customers with generation of any size installed prior to the effective date of this Rider (grandfathered) who have not installed additional capacity as described in item B above, only for the life of the original DG system, and for as long as the DG system is owned by the original customer.

FARMERS ELECTRIC COOPERATIVE, INC. OF NEW MEXICO
ORIGINAL TARIFF RATE 20

STANDBY SERVICE RIDER

Page 2 of 2

MONTHLY RATE:

This rate is intended to pass through to customers additional billing to the cooperative by its power supplier. Each billing period the customer shall be obligated to pay the following charges in addition to all charges indicated on the customer's base rate:

<u>Service Level</u>	<u>Rate</u>
Low Side of Distribution Substation	\$2.61/kW of Standby Billing kW
Distribution Primary Delivery	\$2.72/kW of Standby Billing kW
Distribution Secondary Delivery	\$2.84/kW of Standby Billing kW

DETERMINATION OF STANDBY BILLING DEMAND:

For customers served on tariffs that do not include a Demand Charge component, the Standby Billing kW shall be equal to the nameplate kW capacity of the installed self-generation unit.

For customers served on tariffs which do include a Demand Charge component, the Standby Billing kW shall be the lesser of:

1. The DG System kW for solar (defined as the lesser of total nameplate capacity of solar panels installed or capacity of the system inverter, or as measured by the cooperative-installed DG REC meter recorded maximum DG system kW output in a 12-month period), or
2. The highest metered non-coincident peak demand during the current or previous 11 monthly billing periods.
